SECTION III

TERMS AND CONDITIONS

(1). This facility shall operate as a Processing and Recycling Facility receiving recyclable materials generated from a variety of sources, including municipalities, businesses, individuals, and the spot market. Facility operations shall comply with Parts Env-Wm 308, 311 and 312 of the New Hampshire Solid Waste Rules, as amended. In addition the permittee shall comply with the provisions of Env-Wm 315.09, except that the permittee shall not be required to submit an Existing Facility Limited Permit application until 60 days following the date an application form is supplied by the WMD. Operation of the processing and recycling facility must not interfere with proper closure of the landfill currently located on the same parcel of land, and the onging investigation of the landfill must proceed through closure in a manner to be approved by the New Hampshire Department of Environmental Services.

JUNK DEALER'S LICENSE

TOWN OF NORTHWOOD, NEW HAMPSHIRE

LICENSE # HM2014

The Selectmen have considered the said application of **HARDING METALS, INC**. and his agreements to live up to the terms of Chapter 322 of the Revised Laws of New Hampshire 1955 and such laws and ordinances as have been and may from time to time be established by the Selectmen, and he is hereby licensed to buy, sell, barter or store junk (as defined in Section 1 of said Chapter 322, Revised Laws of New Hampshire 1955) on and at the premises, know as **PRICE FIELD and** approximately **10 (TEN) ACRES** sq. ft./acres of land. This license shall expire **June 30, 2015** unless revoked previous to said date.

Said license is issued after acceptance (1) as true representations and (2) as binding agreements, date set forth in the application for this license. The following regulations and conditions shall apply:

1. The licensee shall maintain **WOODEN FENCE OF SUFFICIENT HEIGHT (as built)** to conceal from view the area upon which junk is to be stored.
2. The licensee shall not purchase from, nor barter with, any person under the age of sixteen(16), unless the parents or guardian of said person shall have previously consented in writing.
3. The licensee shall not conduct a junk business nor store junk on any premises within the Town of Northwood, N.H. other than the premises described in this license.
4. The licensee represents that the statements contained in the application for this license are true. Upon proof that any of said statements are false, this license may be revoked.

This license may be revoked for the violation of the State Law, Zoning Laws or of any of the agreements and Conditions in said application or because of false representations in said application. Provided, however, no license shall be revoked without charges being preferred and only after a hearing, at which the licensee shall have an opportunity to be heard.

Northwood, NH 03261

Subject: **Northwood** – Harding Metals, 42 Harding Drive, Groundwater Management Permit, DES **#198404038**, Project RSN #67

Application for Renewal of Groundwater Management Permit, prepared by Nobis Engineering, Inc., dated June 5, 2009

Dear Mr. Harding:

Please find enclosed Groundwater Management Permit Number **GWP-198404038-N-002**, approved by the Department of Environmental Services (Department). This permit is issued for a period of 5 years to monitor the effects of past discharges of chlorinated solvents.

All monitoring summaries and all required sampling results shall be submitted to the Groundwater Management Permits Coordinator at the address below. All correspondence must contain a cover letter that clearly shows the Department identification number for the site (DES #198404038).

The Groundwater Management Zone for this permit includes properties which are not owned by the permit holder. Therefore, Condition #9 requires the permit holder to provide notice of the permit by certified mail, within 15 days of permit issuance, to all owners of lots of record within the Groundwater Management Zone. Documentation of the notification, in the form of a copy of the notice with return receipt(s), shall be submitted to the Department within 45 days of permit issuance.

Also, please note that Condition #10 requires the permit holder to record "Notice" of the permit (not the permit), within 60 days of issuance, at the registry of deeds in the chain of title for each lot within the Groundwater Management Zone. A separate Notice form for each property within the Groundwater Management Zone shall be generated and recorded. An example Notice is enclosed for your use. A copy of each recorded Notice shall be submitted to the Department and the Town of Northwood within 30 days of recordation.

In a letter dated July 22, 2006, the Department had requested that an evaluation of the lateral and vertical distribution of contaminants side- and downgradient of the Main Metals Area (MMA) and the Sawdust Disposal Area (SDA) be included in the subject groundwater management permit renewal application. This request was not addressed to the Department's satisfaction. As a result, the Department has also added Special Condition #12 where a groundwater monitoring well couplet is required to be installed and routinely monitored. This well couplet is to be installed approximately equidistant between monitoring wells 7H/7AH and N-2S. Harding Metals shall submit a scope of work specifying the location and schedule for the installation of the well couplet within 60 days of permit issuance.

Should you have any questions, please contact me at the Waste Management Division.

Sincerely,

Waste
Management
Division
