

## WHY THIS WORKSHOP?

# Extreme Weather

The Aftermath

- Builds upon the preparedness concepts from Extreme Weather Events Workshop
- Offers some real world scenarios and how you need to handle them
- Allows your peers to share their experience with extreme weather

# **TODAY'S AGENDA**

- What is Extreme Weather & Trends in NH
- It Happened Here & This is What I Did
- Insurance Coverages and Risk Management
- Activity
  - Emergency Preparedness Kit
  - Storm Debris
  - Dealing with Affected People
- What to do to be Prepared?
- SW Emergency Permits

# GROUP ACTIVITIES

#### Group 10 (a,b,c)

- Following this intro stay in the Auditorium
- Break
- Report to:
  - 10a: Room 110 (Kit)
  - 10b: Room 112 (Debris)
  - 10c: Room 114 (People)
- Report back to Auditorium

#### Group 2 (a,b,c)

- Following this intro report to:
  - 2a: Room 110 (Kit)
  - 2b: Room 112 (Debris)
  - 2c: Room 114 (People)
- Break
- Report to the Auditorium

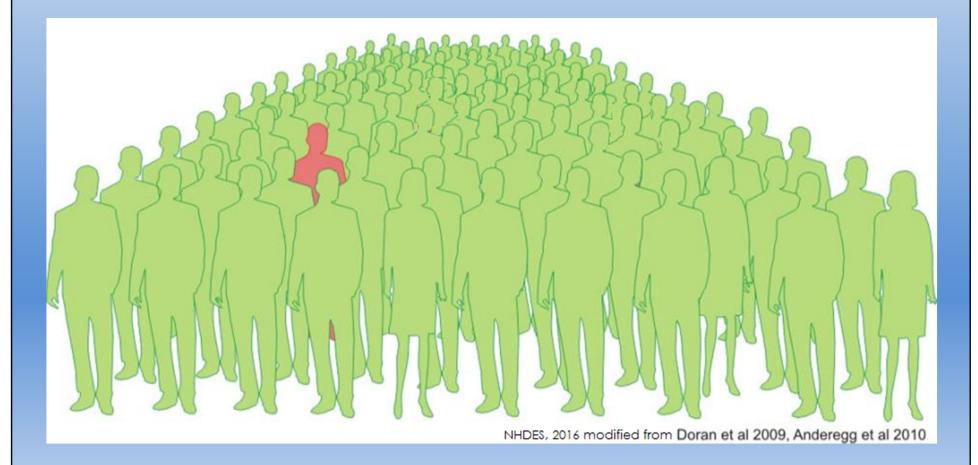

## What is Extreme Weather & Trends Over Time

#### Chris Skoglund NH Department of Environmental Services November 5, 2019

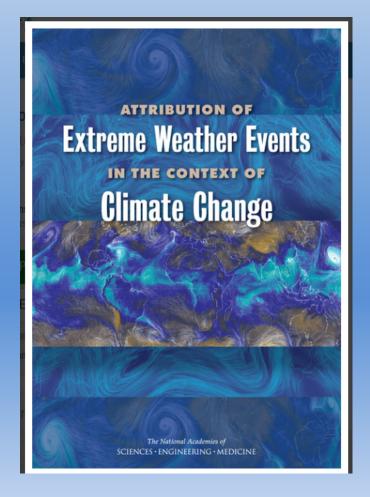

# **Climate Change is Real**

99% of climate scientists agree that the Earth is warming due to human activity (e.g., fossil fuel use and land clearing)

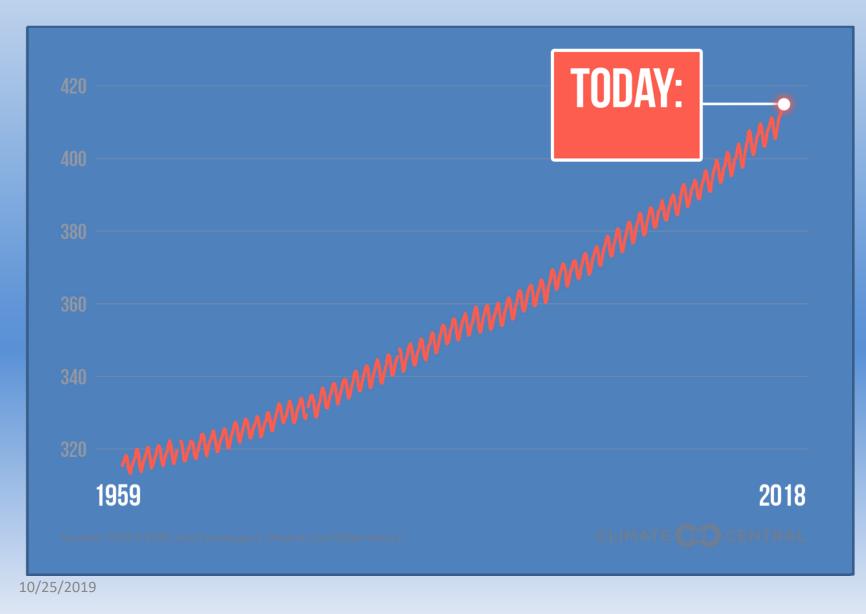

# More CO<sub>2</sub> = More Extreme Weather

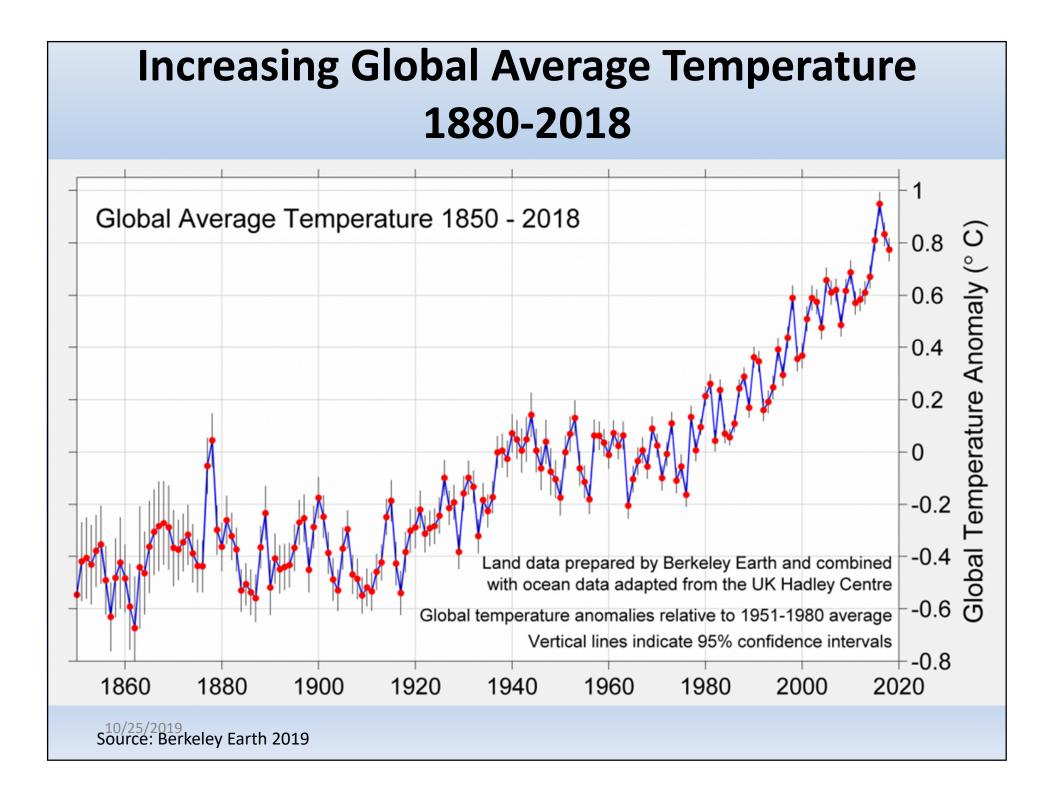

- Scientists now link extreme weather events to increased carbon dioxide in the air from burning fossil fuels.
- More atmospheric CO<sub>2</sub> has boosted the odds of extreme heat, extreme cold, drought, & punishing rain/snow storms ....

The National Academies Press. https://doi.org/10.17226/21852

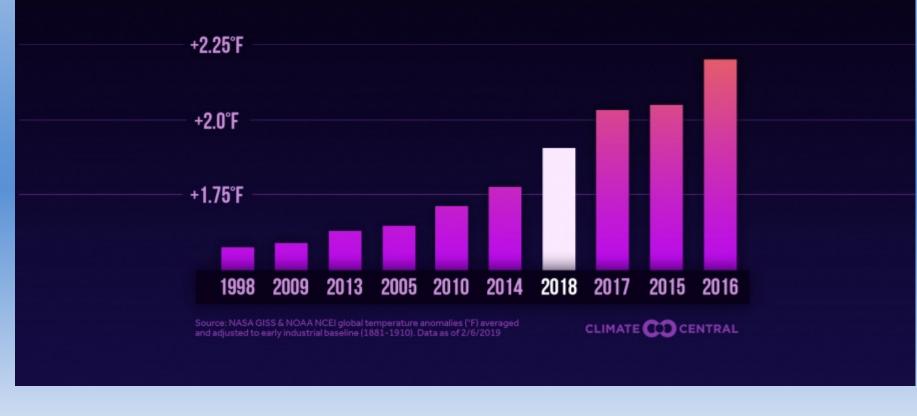

# **Atmospheric Carbon Dioxide Record**

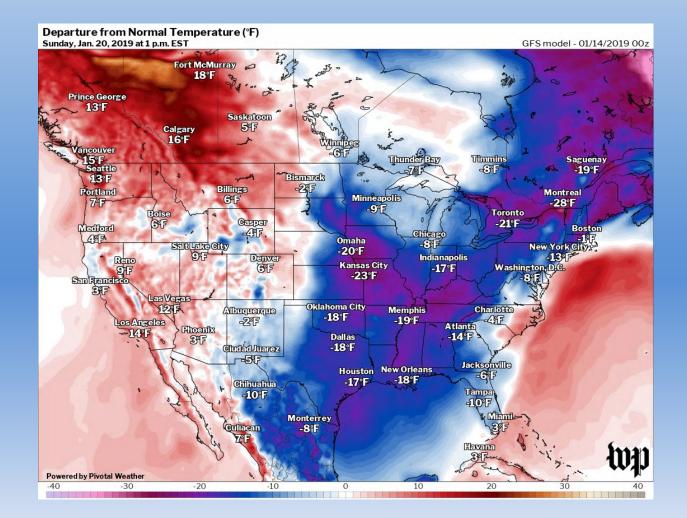

# Increasing Global Average Temperature 1880-2018

#### HOTTEST YEARS ON RECORD GLOBALLY LAST 5 = HOTTEST 5

# Are You Kidding Me?! Have You Checked The WINTER Thermometer??

10/25/2019

#### The Climate is Not the Weather

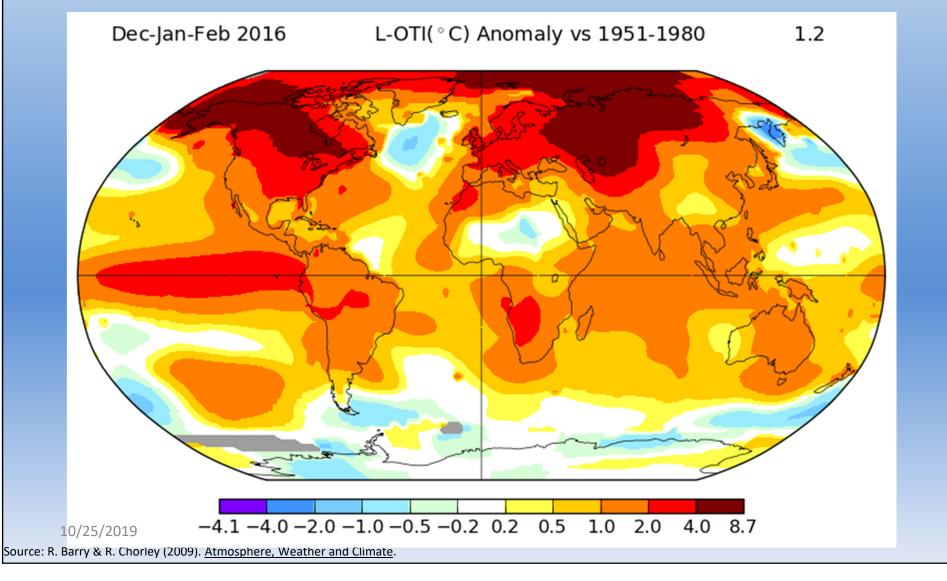

- Weather the set of conditions at any given point in time
  - Today, tomorrow, this week

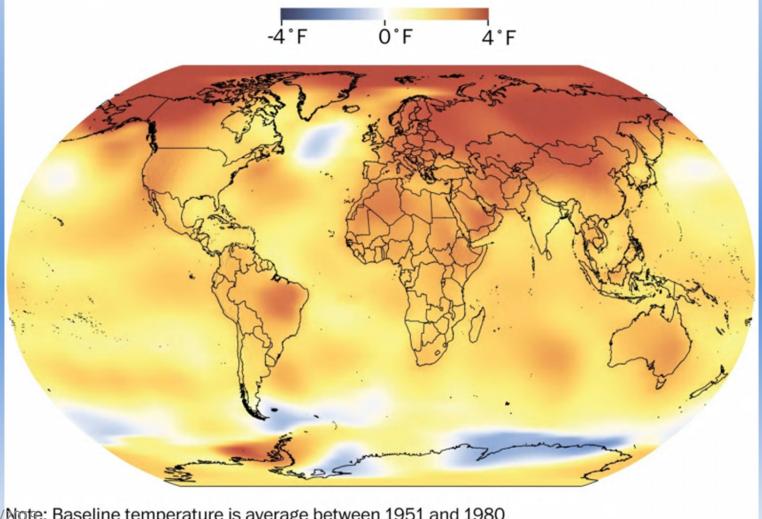

- Climate the average set of conditions over a period of decades
  - 30 year averages
  - Ex. 1951-1980 Baseline

# Changing Weather vs. Changing Climate

# The Earth is Warming ON AVERAGE

Average temperature 2013-2017 compared to baseline

# **Increase in Precipitation Intensity**

#### Amounts and Intensity – rain & snow

# Groundwater will rise with sea level

- Groundwater will extend further in land than sea level rise
- From 1-7ft of ground water rise is predicted at ~2 mi from the coast

- The amount of groundwater rise is not uniform and linear with distance from the coast
- Depends on
  - local hydrogeology,
  - proximity of streams or wetlands,
  - distance from the coast,
  - groundwater pumping.
- Will impact roads, underground storage tanks, drinking water wells, landfills...

Knott J., M. Elshaer, J. Sias Daniel, J.M. Jacobs, P. Kirshen 2017

### Ice Storm & Flooding

Coverage in the aftermath of an Extreme Weather Event- Focusing on Property Coverage and Volunteer Coverage

Presented for: New Hampshire Department of Environmental Services November 5, 2019

Mary Beth Purcell, Director of Claims

# **Property Exposures**

- Buildings and contents
- Mobile equipment
- Builder's Risk projects
- Boiler and Machinery
- Money and securities
- Fine Arts
- Autos
- Cyber

# Property

Covers all risk of direct physical loss or damage including wind, flood and earthquake on real and personal property

- Blanket limit
- Automatic coverage
- Replacement cost for buildings and contents (sub-limits on certain items - bridges, landscape, debris removal and extra expense)
- Actual Cash Value (ACV) for Automobile and Mobile Equipment

subject to all coverage documents terms, exclusions, limits and conditions

# **Property Coverage**

- Off premises property
- Vacant buildings ACV (Actual Cash Value)
- Deductible \$1,000 per occurrence

\$100 vehicle glass breakage

### Deductible for personal use of vehicle

- Personal automobile deductible for Volunteer/Employee on official duty
- Amount of their auto deductible up to \$500, when the loss occurs in the course of employment or Volunteer activity for the Member

## **Debris Removal**

• 25% of the amount we pay for direct loss plus the deductible.

• Example: \$10,000 property damage loss, we paid \$9,000. Debris removal coverage would be \$2500.

## **Extra Expense**

Staying open after a loss pending repair or replacement of damaged property

- Renting other premises
- Extra transportation
- Overtime
- Shipping costs
- Expense incurred to minimize total loss

# Flood Losses

- Each loss by flood shall constitute a single loss hereunder.
- 1. If any flood occurs within a period of the continued rising or overflow of any river(s) or stream(s) and the subsidence of same within the banks of such river(s) or stream(s) or;
- 2. If any flood results from any tidal wave or series of tidal waves caused by any one disturbance;
- such flood shall be deemed to be a single occurrence within the meaning of this Coverage Document.

### Windstorm losses

- We will pay for loss or damage caused by or resulting from risks of direct physical loss involving Windstorm.
- Each loss by windstorm shall constitute a single Occurrence provided however, if more than one (1) windstorm occurs within any seventy-two (72) hours period during the Coverage Period, such windstorm shall be deemed to be a single windstorm.

# Volunteers

- Volunteer" means those individuals undertaking a task of his/her own free will and as authorized and supervised by you. Volunteer does not mean any person defined as an employee in the New Hampshire Workers' Compensation Law.
- Volunteers should be rostered by you.

#### **Volunteer Accident Medical Coverage**

\$10,000 for reasonable and necessary medical expenses excess of any other insurance or coverage for injuries sustained by a volunteer within the scope and arising out of their assigned volunteer activities for you. *Excludes participation in athletic activities.* 

## Contracts

• Be very careful of what you are signing during/after the event. Be wary of price gauging. The contract you sign will make you responsible for whatever the vendor wants to charge.

This summary is for informational purposes only. Please refer to the coverage documents and declarations for coverage details.

All coverage is subject to the conditions, terms, limits and exclusions of the coverage documents and declarations.

#### BREAK

15 MINUTES

- Report to your GROUP Room at 10:30
- 1a: Room 110
- 1b: Room 112
- 1c: Room 114

  - Design and Implementation
- Restoration
- Debris Management

State of New Hampshire Debris Management Plan

The purpose of the Debris Management Plan (DMP), is to facilitate the removal, management, collection, and disposal of all debris generated from a catastrophic disaster.

- 1. Provide overall coordination for the state-wide debris management plan implementation.
- Provide for the allocation of human, technical, and financial resources already available for debris management and generate additional support as required.
- 3. Provide for the coordination of debris management on a state and local level including collection, sorting, recycling, and disposal operations.

State and local efforts to manage excessive debris may include the following actions in order of priority:

1.Appointment by local governments of a "Disaster Debris Coordinator" as a single point of contact to facilitate the exchange of information with the DPM.

2.Increased ground and aerial surveillance to supplement local damage and debris assessment efforts.

3.Locate and establish Temporary Debris Storage and Reduction Sites (TDSRS) as necessary.

4.Reinforcement of local public works organizations dedicated to debris removal.

- 5. Execution of contracts for pre-qualified contractors to provide debris management and debris monitoring services for state and local debris removal.
- 6. Coordination of emergency assistance utilizing assets from local, state, and federal agencies.
- 7. Monitoring of transfer points and landfills to determine the requirements for staging, recycling, and environmental waivers.
- 8. Implementation of a public information program to ensure public awareness and cooperation with debris clearance operations.

Procurement Requirements – FEMA Assistance

- 1. Follow local procurement procedures, must be at least as stringent as Federal regulations (Title 44, part 13)
- 2. Competitive bidding must be used except for initial emergency situations, ONLY in rare circumstances is non-competitive contracting allowed.
- 3. Community not required to select low bid in the competitive bid process.

Contractor Selection – FEMA Assistance

- 1. Consideration may be give to following factors:
  - a) Record of past performance
  - b) Compliance with Public Policy
  - c) Contractor integrity
  - d) Financial and technical resources
  - e) Cost
  - f) References
  - g) Proposed work plan

General Guidance

1.Initial Response – Debris Clearance

Clearance of debris for life saving actions and debris that poses immediate threat to public safety.

2.Recovery – Debris Removal

Removing and disposing of debris hindering recovery and less immediate threat to public safety.

3.Sort, reduce, recycle, reuse, disposal

#### Prioritization

1.Essential facilities

2.Public and private roads and bridges for emergency access

3. Waterways essential to state commerce

4. Public Utility facilities

5. Public access to commercial establishments

6.Public streets adjacent to private residential

- 7.Schools, libraries, and educational
- 8. Public recreational facilities

#### Collection Methods – storm debris only

• Curbside

State

Local

Private

- Collection Centers/Disposal Facilities
- Debris Management Sites

Temporary Debris Storage and Reduction Sites

Eligibility – FEMA Assistance

- 1. Result of declared disaster event
- 2. Located within designated disaster area
- 3. Eligible Applicant
- 4. Eligible Facility
- 5. Eligible Work
- 6. Eligible Costs

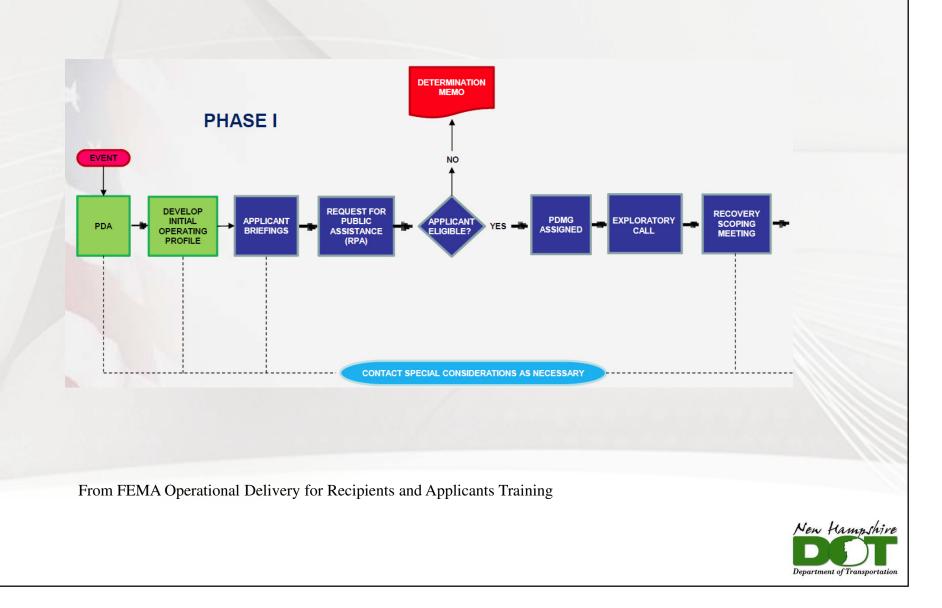

Documentation – FEMA Assistance

- 1. Damage and debris photographs (gps located)
- 2. Load slips or work logs with quantities
- 3. Force Account
  - a) Time cards, equipment logs
  - b) Pay policies
- 4. Contracts (Invoices)
- 5. Disposal Locations ("Cradle to Grave")

Telephone: 603-271-2693

# **Emergency Permits**

Tara Mae Albert

SWOT Coordinator

#### Emergency Permits (Env-Sw 313)

#### What Are They?

 Permit allowing facilities to operate for a limited period of time in response to an emergency

#### When Do You Need One?

- When no other readily available response exists
- If a delayed response to any other type of permit will result in unnecessary risk to public health, safety or the environment

# **Emergency Permit**

T .... 01 01

#### **Local**

Health officer or fire chief that the conditions do pose a threat to public health, safety or the environment, or, if such certification cannot be obtained, a statement that such certification was sought and an explanation as to why certification was refused.

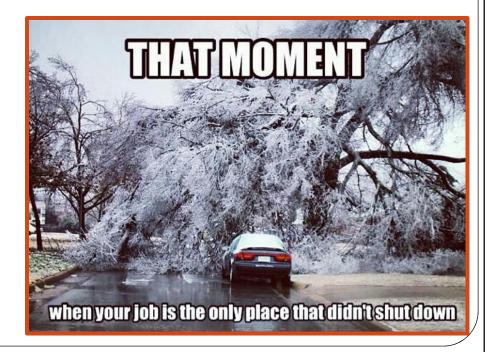

Make a plan

· ··· ·····

# Things/Situations to Consider

- Neighboring Facilities
- Memorandum of Understanding
- Staffing
- Insurance coverage
- Volunteers
- Existing permit
- Vendor contacts

# Filing & Processing

# Emergency Permit Filing & Processing (Env-Sw 313)

#### Filing

- Applications MUST be signed and filed by the applicant in accordance with Env-Sw 303.
- Emergency Permit does
  NOT mean rules are
  thrown out the window!

#### Processing a Complete Application

- Determine whether the information demonstrates the activity is necessary to protect environment, public health & safety.
- If approved, it is issued orally immediately and in writing within 10 working days.
- Effective for specific time period.

# **Final Thoughts**

- The Frequency of Extreme Weather Events is Increasing
- Your Facilities Will Be Affected
- Your Families Will Be Affected
- Your Customers Will Be Affected
- Be Transparent
- Be Prepared

#### Any Questions??
