

Operator Response Guidelines

Spill Reporting Procedures

If a spill occurs and any one of the following is true:

- a. 25 gallons or greater
 - b. Is not contained
 - c. Is not removed within 24 hours
 - d. There is impact to groundwater or surface water
 - e. Vapors have been emitted that cause an immediate threat to human health
1. Contact your local 911 responder or fire department
 2. Call the NHDES Spill Response and Complaint Investigation Section
 - a. Monday – Friday, 8am to 4pm, (603) 271-3899
 - b. Weekends and Evenings, Call the State Police (603) 223-4381

If a spill occurs where all 5 of the circumstances above are false, contact you're A or B operator immediately. If possible, try to mitigate the spill by throwing speedy dry onto the spill area and/or using absorbent pads.
