

What are Exotic Aquatic Plants?

Exotic Aquatic Plants are not native to a particular area. New Hampshire is currently battling eight species of Exotic Aquatic Plants in its lakes and waterways. Over seventy waterbodies are now impacted by exotic aquatic plant growths.

These invasive plant species can reduce the recreational value of waterbodies, and can decrease the economic value of waterfront property according to a 2001 study by the University of New Hampshire. These plants can also be dangerous to swim in, and can harm native aquatic plants and animals.

The map included in this brochure is intended to be a guide to the waterbodies that have existing Exotic Aquatic Plant problems. Please use extreme caution trailering boats and aquatic equipment from waterbody to waterbody!

**STOP THE SPREAD OF
EXOTIC AQUATIC
PLANTS!**

WHAT CAN YOU DO?

- Each time you launch or remove your boat from a waterbody, check the boat, trailer and hitch for attached plant fragments. Remove all fragments from your equipment, and dispose of them away from the waterbody.
- Avoid boating or fishing in areas with dense plant growth
- Steer clear of marked "Restricted Use Areas" on waterbodies. These areas were established to contain Exotic Aquatic Plant fragments.
- Look for signs posted at boat launch locations. These signs will warn if that waterbody has an Exotic Aquatic Plant.
- Join the Volunteer Weed Watcher Program and help monitor for Exotic Aquatic Plants.

ATTENTION BOATERS!

Are you unknowingly
spreading
Exotic Aquatic Plants?

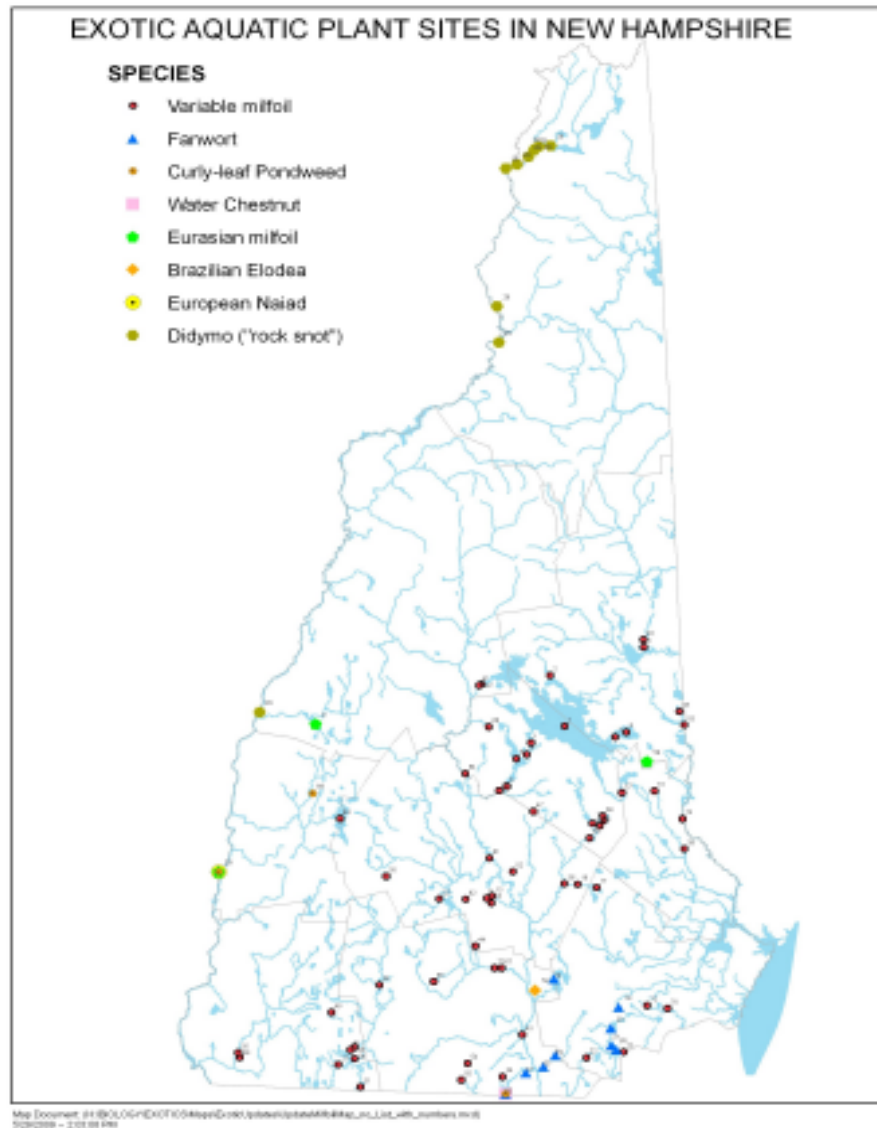

Have you been boating, fishing
or recreating on waterbodies
with Exotic Aquatic Plants?

It is *illegal* to transport and
introduce Exotic Aquatic
Plants in New Hampshire!
