OFFICIAL LIST OF PUBLIC WATERS
Published Pursuant to RSA 271:20 II (effective June 26, 1990)

IMPORTANT NOTE: Do not use this list for determining water bodies that are subject to the Comprehensive Shoreland Protection Act (CSPA). The CSPA list is available at <http://des.nh.gov/>.

Public waters in New Hampshire are prescribed by common law as great ponds (natural waterbodies of 10 acres or more in size), public rivers and streams, and tidal waters. These common law public waters are held by the State in trust for the people of New Hampshire. The State holds the land underlying great ponds and tidal waters (including tidal rivers) in trust for the people of New Hampshire. Generally, but with some exceptions, private property owners hold title to the land underlying freshwater rivers and streams, and the State has an easement over this land for public purposes.

Several New Hampshire statutes further define public waters as including artificial impoundments 10 acres or more in size, solely for the purpose of applying specific statutes. Most artificial impoundments were created by the construction of a dam, but some were created by actions such as dredging or as a result of urbanization (usually due to the effect of road crossings obstructing flow and increased runoff from the surrounding area). The land surrounding and underlying many artificial impoundments is privately owned. Statutes defining them as public waters do not have any effect on the ownership of the land underlying the water bodies.

The New Hampshire Revised Statutes Annotated 271:20 (RSA 271:20) requires that the Department of Environmental Services (DES) create and maintain a list of all public waters in the state. This statute references water bodies that are held in the public trust (or "owned by the State"), specifically natural bodies of water situated entirely in the state that have an area of 10 acres or more.

The New Hampshire Code of Administrative Rules Chapter Env-Wr 900 (Env-Wr 900) requires that DES post the official list on its internet site, see <http://des.nh.gov/organization/commissioner/legal/rules/>. The purpose of these rules is to develop a standard for the publication and maintenance of the official list of public waters required by RSA 271:20. Env-Wr 900 also requires that the official list include the status of water bodies in New Hampshire with respect to RSA 4:40a, RSA 371:17, RSA 482-A:21, RSA 482-A:16, RSA 215-A:1, RSA 483-B:4, and RSA 223-A:1. These statutes include references to public waters and public-owned water bodies in the context of other laws, including environmental, public access, and public utilities laws. The language of these statutes is available at <http://www.gencourt.state.nh.us/rsa/html/nhtoc.htm>.

The Official List of Public Waters (OLPW) is based on the best available data. The format of this edition of the OLPW is intended to clarify the application of statutes and common law. The list may be updated as statutes and/or rules are revised or as

more thorough investigations of water bodies are conducted. Investigations of the original area of naturally occurring water bodies and/or the limits of water bodies held in the public trust (“owned” by the state) require significant resources, often times including the coordination of efforts from more than one state agency. Questions relative to the status of water bodies on the list should be directed to DES.

Part I, “Public Lakes and Ponds” includes a table that shows which statutes apply to specific water bodies, based on whether they are great ponds, artificial impoundments 10 acres or more in size, or great ponds which have been enlarged by artificially impounding water above the elevation of natural mean high water.

Part 2, “Public Rivers and Streams” is a partial listing of this set of common law waters. The current list is primarily based on the listing of rivers that fall under the jurisdiction of the Comprehensive Shoreland Protection Act (RSA 483-B:4). There are many other public rivers in New Hampshire, which will be added to the Official List of Public Waters in the future.

Part 3, “Tidal waters” includes waters off the coast of New Hampshire and rivers that are affected by the ebb and flow of the tide.

Important Acronyms

RSA 271:20 (New Hampshire Revised Statutes Annotated 271:20) – New Hampshire law that requires a list of all public waters in the state be established and maintained, see <http://www.gencourt.state.nh.us/rsa/html/nhtoc.htm>.

Env-Wr 900 (New Hampshire Code of Administrative Rules Chapter Env-Wr 900) – New Hampshire rules that govern the establishment and maintenance of the list of public waters, see <http://des.nh.gov/organization/commissioner/legal/rules/>.

OLPW (Official List of Public Waters) – The Official List of Public Waters is the list as required by RSA 271:20 and Env-Wr 900.

NL (Natural Lake) – NL is a water body that is over 10 acres, naturally occurring, with no man-made barrier restriction at outlet (e.g., dam, culvert, bridge).

RD (Raised by Damming) – RD is a water body that started out as a NL and a dam was constructed at the outlet. Because these water bodies were naturally occurring and over 10 acres to begin with, all RDs on the OLPW are held in the public trust under RSA 271:20. Although it is most often the case that the installation of a dam raises the water level of an impoundment, RDs are not necessarily “raised” and technically speaking could be less than 10 acres after damming (no known examples). At Lake Winnepesaukee the dam regulates the water level and is capable of lowering it, however it was well over 10 acres as a naturally occurring lake. At Lake Ossipee the outlet canal that was dredged when the dam was constructed and allows the impoundment to be lowered to a depth below the elevation of the original natural lake, which was also over 10 acres.

AI (Artificial Impoundment) – AI is a water body, regardless of size, that was not created by nature. Examples include man made ponds or reservoirs. AIs are impoundments that were not NLS to begin with (over 10 acres as a naturally occurring water body). No water bodies that are listed as AIs meet the definition of state-owned public water in RSA 271:20. AIs under 10 acres do not meet the requirements of the RSAs referenced in the OLPW and, therefore, are not on the official list. AIs over 10 acres may meet some of the RSAs on the list. Examples of AIs include Horace Lake (Weare Reservoir), Lake Deering (Deering Reservoir), and Lake Francis (Pittsburg).

FI (Further Investigation) – A notation of FI associated with a waterbody means that preliminary research has been done that suggests a change to the designation may be appropriate; however, the documented justification is incomplete.

OFFICIAL LIST OF PUBLIC WATERS
New Hampshire Department of Environmental Services, Water Division
Part 2

LIST OF FRESHWATER PUBLIC RIVERS AND STREAMS

This is a partial list of freshwater public rivers. The exclusion of a river from the Official List of Public Waters does not indicate that it is not a public waterbody. As additional rivers are determined to be public waters, either by the Department of Environmental Services or by the NH judicial system, they will be added to this list. Final determinations of "navigability" or "useful purposes" are ultimately dependent on judicial interpretation and cannot be made conclusively by administrative agencies.

River Sections Defined as Public Waters as per RSA 483-B:4, XVI(c)
