Attn: Wayne Wheeler, Supv. of permitting & Design Review
section of DES Solid waste management Bureau, Concord,
NH.

Dear Mr. Wheeler:

I care about my water system for all concerned. Please do not approve Mr. Cassela's (of Best Way garbage removal) application to expand his business to include heavy metal & hazzard waste in it's contents. This would pollute our aquifers and would result in degrading our general health in the long run.

Because of night time vision problems I could not physically attend the recent meeting but feel intently on this matter.

Count me among the people who do NOT want this passed.

Sincerely,

Marie Tallmadge
