Bestway Disposal Services
43 Industrial Drive; Belmont, NH

Dear Mr. Wheeler,

It has come to my attention that the water supply for our school Tilton School may be potentially put at risk through a proposed project involving Bestway Disposal Services in Belmont, NH.

I believe this proposed project will pose a significant and serious threat to our only water supply for the school, which serves over two hundred resident students, and ninety employees and their families. In the public hearing, the questions that were presented by the engineer for the TNWD were not adequately addressed, and cause great concern to me. The fact that this project could negatively affect the quality of our drinking water is unacceptable. I urge you to consider the ramifications to the residents of the towns of Northfield and Tilton as well as our school before granting approval to this project.

Thank you for your consideration.

Sincerely,

Peter Saliba
Head of School
Tilton School
