SUBJECT: NASHUA- Building Products Recycling Operation, LLC, 571 South Main Street

Certified Waste Derived Product (CWDP) for Distribution and Use Permit Application, Enviropave Paving Material, Applicant is Ansel Grandmaison, Prepared by SBR Environmental Inc., Ref.: WMD Doc Log # 2011700, 2011726, 2012002, and 10323

Dear Mr. Grandmaison:

The New Hampshire Department of Environmental Services, Waste Management Division (Department) has completed a review of your letter dated April 4, 2012 and has the following comments:

In 2003, the Department approved Certified Waste Derived Product No. 17 "Aggraphalt" which allowed a maximum roofing shingle content of 40%. The Department has not been able to find documentation of the use or market for shingle aggregate with an asphalt shingle concentration greater than 40%.

Unless Building Products Recycling Operation is able to provide additional information regarding the use of and market (Env-Sw 1504.04 (b)) for shingle aggregate with a shingle content greater than 40%, the Department is unable to approve a certified waste derived product with a content greater than 40%.

Please let us know how you would like to proceed and if you have any questions.

Sincerely,

Paul M. Gildersleeve, P.E.
Solid Waste Management Bureau
