Drought Severity Index by Division
Weekly Value for Period Ending OCT 10, 2009
Long Term Palmer

THE PALMER DROUGHT SEVERITY INDEX

The Palmer Index uses temperature and rainfall information in a formula to determine dryness. The advantage of the Palmer Index is that it is standardized to local climate.

Additional Precip. Needed (In.) to Bring PDI to -0.5
Weekly Value for Period Ending OCT 10, 2009
Long Term Palmer Drought Severity Index (PDI)

This is the amount of rainfall required in a week's time to bring the index back to zero inches required.
