Proposed Discharge Information

- a. **Purpose of Discharge**
 Well Pump Test
 Well Redevelopment or Rehabilitation
 Storage Tank Purging or Cleaning
 Other _____
- b. **Location and Distance of Closest Sanitary Sewer:** _____
- c. **Proposed Discharge Location**
 Name of site, if different from Part I: _____
 Address: _____
 City/Town: _____ State: NH _____ Zip: _____
- d. **Proposed Discharge Rate**
 Estimated Maximum Discharge _____ gpm for _____ hours per day = _____ gpd
 Proposed starting date: _____
 Estimated number of days discharge will be required: _____

e. Proposed Receiving Water

Receiving Water Name: _____
State Water Quality Classification: A B (discharge to Class A not allowed)
City/Town: _____
Description of Location: _____

(Include a location map which sites the point of discharge of the treatment effluent, such as: storm drain, drainage ditch, etc., **and** the exact area or point of final discharge at the surface water (USGS map)).

f. Discharges to Ponds/Lakes

In order to ensure that the requirements of Env -Wq 1700 are met, the applicant must check one of the following if the proposed discharge is to a lake or pond, or to a tributary of a lake or pond.

- There is no evidence that site activities have contributed Phosphorous to the ground/groundwater. Levels of Phosphorous in the groundwater are expected to be as naturally occurring.
- Site activity, including septic systems, may have contributed phosphorous to the ground/groundwater. Phosphorous sampling will be required before the application can be processed. The applicant should contact the Temporary Permit Coordinator for guidance on groundwater sampling. Depending upon sample results a permit may or may not be issued.

g. Proposed Treatment

Type of Treatment Proposed (include information on chemicals used and neutralization methods, influent and effluent testing and method to verify final water quality): _____

h. Groundwater Quality Information

Provide a summary of the most recent groundwater quality and monitoring results (including pH, arsenic, Iron, manganese, radionuclides, chlorides, and total VOCs (laboratory results should also be attached to application):

<u>Location</u>	<u>Compound(s) Exceeding Water Quality Standards</u>	<u>Concentrations(ug/L)</u>

III APPLICANT CERTIFICATION

To the best of my knowledge, the data and information which I have submitted to obtain the Temporary Surface Water Discharge Permit from the New Hampshire Department of Environmental Services are true and correct.

I agree not to discharge to the surface waters of the State until I have received both a written permit from the Department of Environmental Services and/or a Permit or written authorization required by the USEPA's NPDES Program. I agree not to discharge after the Department permit has expired.

Date: _____ Signed: _____
Owner/Operator

IV Permit Issuance Information

1. Applicant submits the completed original New Hampshire Temporary Surface Water Discharge Permit application to DES.
2. DES reviews and determines if permit is warranted and necessary.
3. DES issues a Temporary Surface Water Discharge Permit, a temporary permit limited to a maximum discharge period of 120 days. DES establishes its required discharge limits and monitoring requirements in the temporary permit.
4. Applicant may begin discharge after receiving written authorization from DES.
5. If the discharge period is expected to be greater than 120 days, or is associated with a site remedial action, the applicant must apply for a General NPDES Permit for Construction Dewatering Activities or a Remediation General Permit both issued by EPA. The applicant must also submit a completed State application. For information concerning the NPDES General Permitting Requirements please contact Jeff Andrews at (603) 271-2984

No liability is incurred by the State by reason of any approval for Temporary Surface Water Discharge Permit.

Approval by DES is based on information supplied by the applicant.

No guarantee is intended or implied by reason of any advice given by DES or its staff.
