

By clicking the “I Agree” below, you agree that you have read and understand the following terms and conditions:

NHDES Land Resources Management is committed to responding to complaints as quickly and efficiently as possible. Because of the high volume of complaints received, complaints are prioritized. Prioritization is based on the potential, or on-going threat to, human health and the environment.

Land Resources Management has developed this interactive tool to assist the public in determining if an alleged violation is located within valuable wetlands. This map identifies only large-scale wetlands and is not designed to identify all wetlands on a landscape. The only way to determine if wetlands are present on a property is to have the area examined by a [New Hampshire Certified Wetland Scientist](#).

The data within this interactive tool is sourced from NH Granit and other NH State Agencies. Despite continuous efforts to identify and correct errors within this data, the contributing agencies make no claim as to the validity, reliability or to any implied uses of this data.

[I Agree](#) to the Terms and Conditions.
