Map 7 - Agricultural Soils

Master Plan 2004

Draft August 11, 2004

Disclaimer for Soils Information:

This Merrimack County Soils GIS coverage was produced by the USDA, Natural Resources Conservation Services (NRCS). It is a draft product and is being made available as a conditional interim release. It is subject to change and not finalized or deemed official for public distribution. This data is being distributed to Planning Commissions only and should not be distributed to others. Data users are responsible for obtaining the most current copy of the data.

This data was compiled at a scale of 1:24,000. Delineations depict the dominant soils occurring on the landscape at that scale. Inclusions of other soils too small to be delineated are present within the delineations. There is no information on the specific locations of inclusions within the delineations. Enlargements of these maps to scales greater than 1:24,000 is a misuse of the product and can cause misunderstanding of the detail of mapping. If enlarged, maps do not show the small areas of contrasting soil that could have been shown at a larger scale. This soil information and interpretations derived from it are intended for broad planning purposes only. For site specific information, onsite sampling, testing and detailed studies are necessary.

For further information, contact the NRCS State Soil Scientist, Steve Hundley at (603)868-7581.

N
Scale 1" = 4000' (1:48,000)

DISCLAIMER:
This map series is intended for use with the Dunbarton Master Plan. The information presented is to be used for planning purposes and may not represent actual geographic conditions. Inaccuracies should be directed to the Town of Dunbarton or to the Central New Hampshire Regional Planning Commission.

Data Sources for the Dunbarton Master Plan Series include:
USGS quadrangles through NH GRANIT (1:24000); Society for the Protection of New Hampshire Forests (1:24000); Digital Tax Maps by Cartographic Associates, 2002; NH Department of Environmental Services (1:24000); Federal Emergency Management Act; NH Department of Transportation; US Geological Survey (1:24000); Natural Resources Conservation Service; Dunbarton Master Plan Subcommittee input; and CNHRPC (1:24000).

Corrections to existing layers by the Town of Dunbarton and CNHRPC.

Legend

Agricultural Soils

- All areas are prime farmland
- Farmland of local importance
- Farmland of statewide importance
