Base features are from USGS 1:24000 scale digital line graphs, as archived in the GRANIT database. All base features distributed by Complex Systems Research Center, Durham, NH. Road features are from NH DOT and updated by SNHPC with GPS. Conservation Lands last updated in 2003. Tax Map last updated August 2002 by SNHPC. National Wetlands Inventory provided US Fish and Wildlife Service, last revised September 2001. FEMA Floodplain information is currently unavailable for the towns of Dunbarton, Bow, Pembroke and Allenstown.

This Merrimack County Soils GIS coverage was produced by the USDA, Natural Resources Conservation Service (NRCS). It is a draft product and is being made available as a conditional interim release. It is subject to change and not finalized or deemed official for public distribution. This data was compiled at a scale of 1:24,000. Delineations depict the dominant soils occurring on the landscape at that scale. For further information, contact the NRCS State Soil Scientist, Steve Hundley at (603)868-7581.

"Digital data in NH GRANIT represent the efforts of the contributing agencies to record information from the cited source materials. Base features are from USGS 1:24000 scale digital line graphs, as archived in the GRANIT database. All base features distributed by Complex Systems Research Center, Durham, NH. Road features are from NH DOT and updated by SNHPC with GPS. Conservation Lands last updated April 2003.

This map illustrates the general location of rare plants, wildlife, and natural communities (natural communities are different types of wetlands, forests, etc.). Precise locations are not shown due to the data's sensitive nature. The NH Natural Heritage Inventory's database contains more detailed information including locations, population sizes and habitat descriptions.

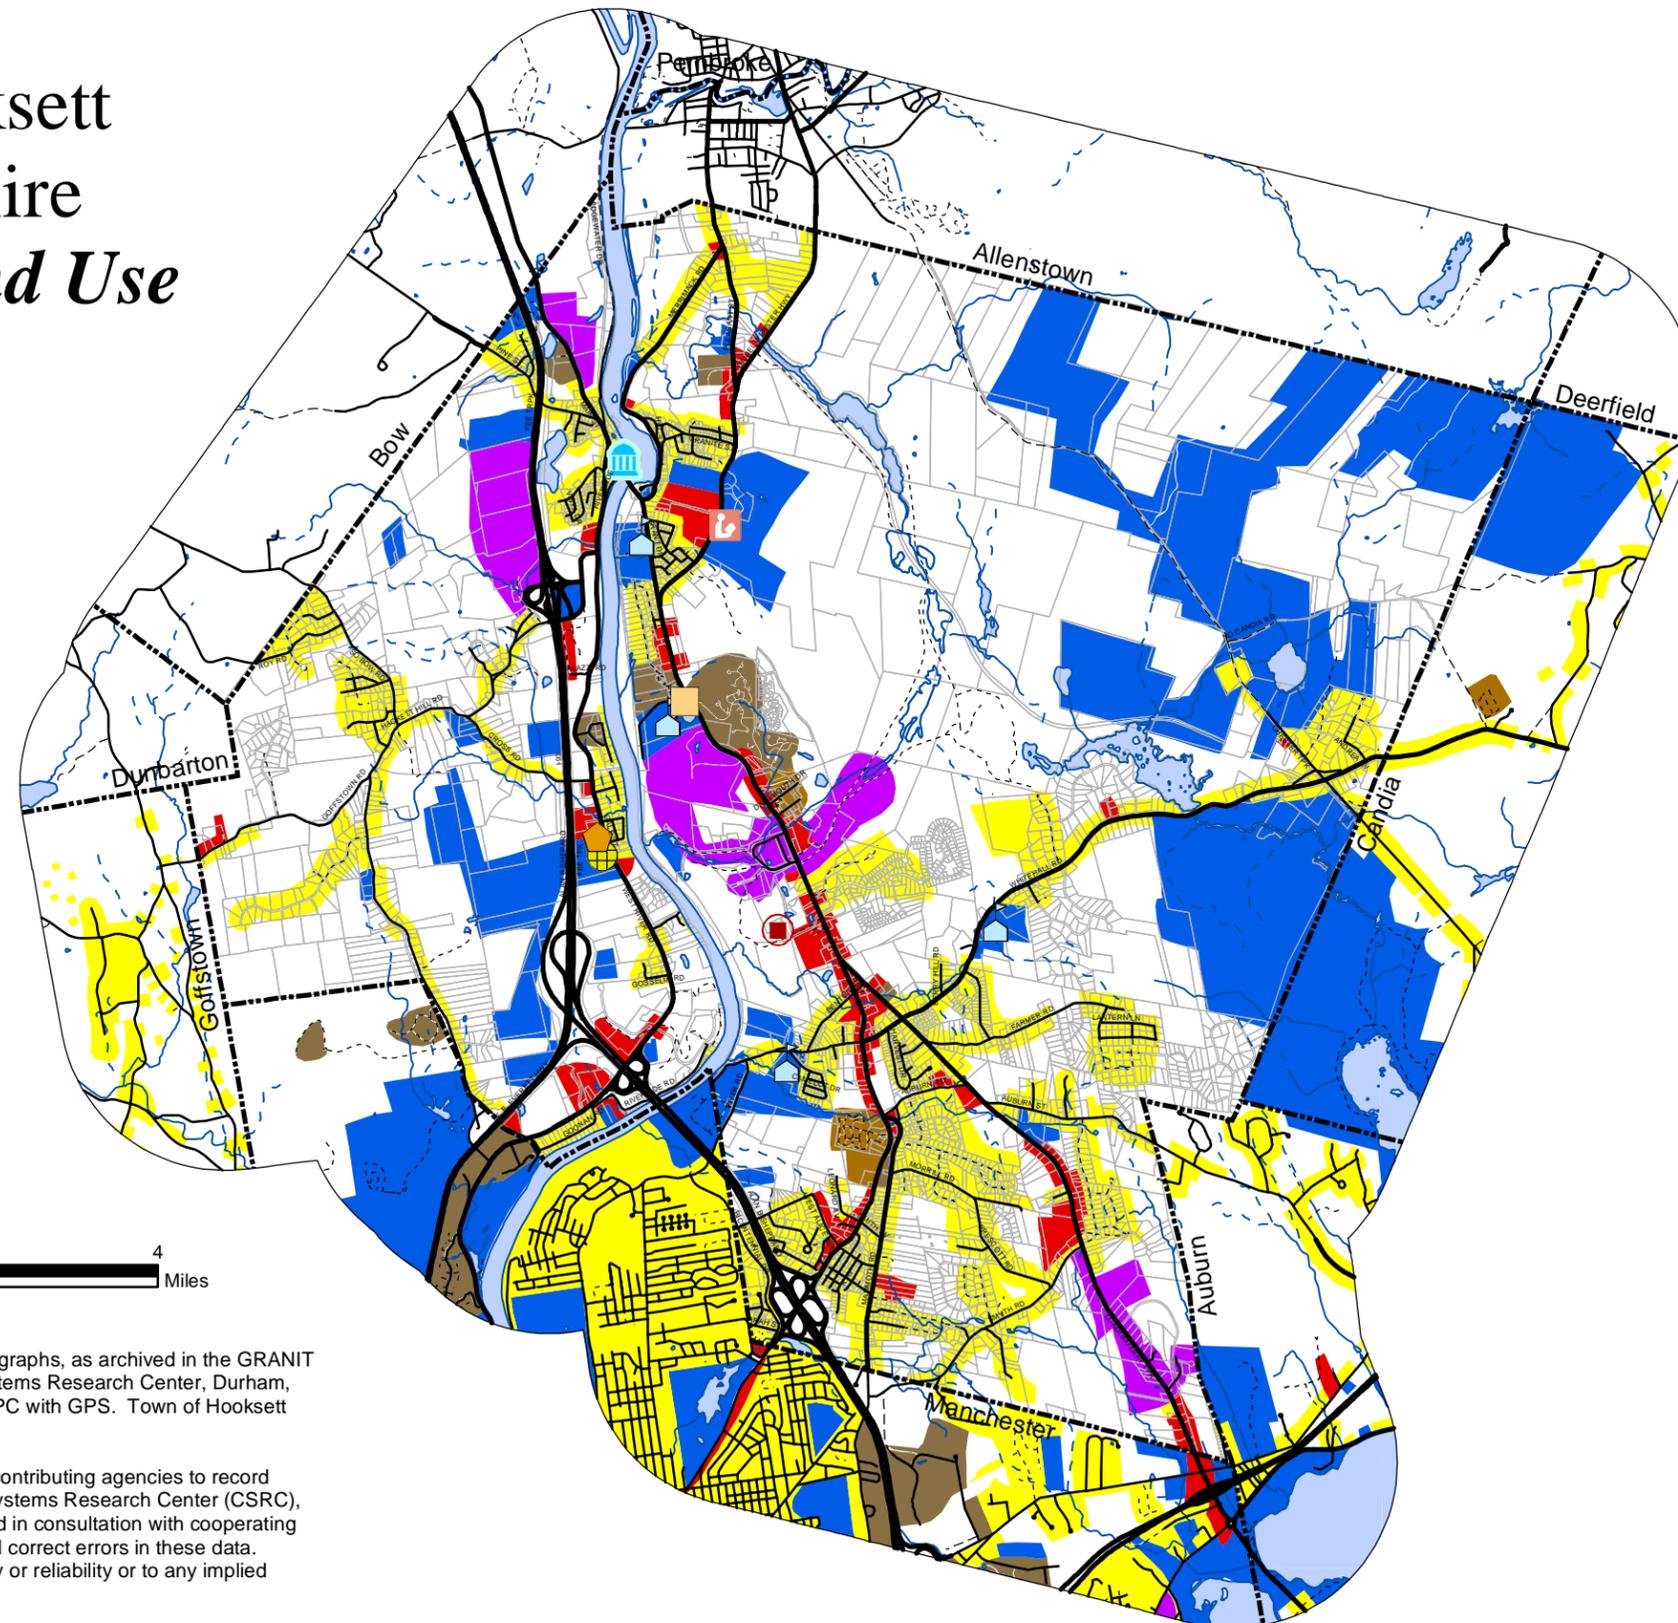

Please contact the Natural Heritage Inventory at (603) 271-3623 for more information. Wildlife occurrences are compiled and displayed in cooperation with the NH Fish & Game Department's Nongame Program, who may be reached at (603) 271-2462.
